matter, and what we've added back into this section then is notarized birth registration and a certified birth registration as forms of identification. What this means is that the hospital birth registration that parents get with the birth of their child and is maintained in their records and is used for entry into school at the kindergarten level or whatever, for other types of identification, it's put back in as a identification for...or an acceptable identification for approval. And then all of the other forms of identification, including an affidavit from the parent, are still in place. The other section of this bill provides that a state identification card may be issued by the county treasurer upon application with the county treasurer. Under current process, state ID cards have to go through the driver's license process first in that they, the person needing a state ID card goes to the drivers' license examining station, waits their turn, then they fill out, provide their...fill out the application, provide their two forms of identification, and then they go to the county treasurer's office for the issuance of the state ID card. It just appeared to me that this was overapplication of government. And since the only issuing office involved was the county treasurer's office, that that office ought to be able to take the application and examine the two proofs of identification and go ahead and then finish out the state ID card, which is the current practice. It simplifies government a little bit for the people who need a state ID card. With that I would move the advancement of 1073.
